What are your favorite and least favorite technology products and why?

We are in a 21st century where technology is everywhere and a lot of people are now using it. Every technology has its advantages and disadvantages depending on the person who is using it. For me as part of the 21st century learners I do love cellphones, pc computer, and chargeable fan because it is convenient especially now that we are in the middle of pandemic and very efficient for hot temperature. lastly, technology is a big help for us and for me there is no technology products that I dislike because as what I have said it depends on the person and for me everything is all worth it.

What was the last gift you gave someone?

Each and everyone of us is different when it comes to sentimentality but me myself is very sentimental and If I am the one who is giiving gifts, I make sure that the person can really use that thing for everyday life. I am a first time Godmother so for me a dress is cute and she can use this everywhere she go. Also, I am that kind of person that is happy seeing that person is using the gift I gave and it is so fullfiling to me.
