

1.If anything was possible, what would your dream job be, and why?

My dream job would be to become a scientist, I would find and look for cures for diseases and viruses. Since we value life and find a cure to all diseases can be treated easily. I have come up with thinking this since the pandemic brought a scare to a lot of people. Everybody cower in fear of the disease. We can see the difference if there is a cure the pandemic can easily be overcome. Scientists study the cause of the pandemic they find cures do trial and error methods and a lot of experiments have been done. It took years for us to have a cure for the virus that caused this pandemic. Since this pandemic when people got infected and get hospitalized it costs a lot I am concerned about the poor people. Honestly speaking I would plan some special days on which I will treat all the poor people either free of cost or at minimum cost. This is just to help mankind.

2. Have you ever experienced a stressful situation in your past workplace (college if fresh graduate), what was it and how did you overcome it?

In our everyday life, we are asked and challenged by stressful situations. Wherever we are at home work anywhere we go. The main thing that brought stress to us is the problems that we encounter is financial. This is one of the things that puts us in a stressful situation. This is my recent job as of the moment and I have a family to tend to my son is turning one this 29th of the month. I am doing everything I can to earn money for them I am not working just for me but for my family. I always take that as an inspiration and a positive view if problems come. Remember there is always light in the darkest of days.

3. In your previous position, what task did you find most challenging and why? What task did you enjoy most and why?

The most challenging task is to pass the paid trial. Since this is my second time around for the paid trial. We are just given 10 days or so to make or break. I know that the chances given to you have to take care of it. You need to value that since others do not have those opportunities that you are currently in right now. I enjoyed being here because this is a really wonderful workplace environment to be with. This is why I am working doing everything I can in my end to make it.

4. How would your previous managers/coworkers describe you?

Honestly only the closest coworkers know me well. They say I am that person who smiles a lot and jokes around. Since when you are always happy or smiling you always have a positive view of things.

5. What personal or professional accomplishments are you most proud of?

I am proud of my personal accomplishment, since my baby is born and I have a family. That marks the day that nobody can beat father time. I marked that date that things in life has a different view and you are no longer doing things for yourself but for your family. The happiness the joy my family brought is incomparable and immeasurable beyond human bounds.
