

1.If anything was possible, what would your dream job be, and why?

If anything is possible, my dream job would be a professional DOTA 2 Player. Ever since I was in High School, I have been really into computer games. DOTA 2 is my main game, DOTA means "Defense Of The Ancients" it is a Multiplayer Online Battle Arena (MOBA) type of game. Back then every afternoon after our class ended I together with my friends would go straight to a computer shop to play DOTA 2. I was inspired to be a professional DOTA 2 player by a Pro Player named "Miracle". Miracle was one of the most talented players in the game of DOTA 2. For me and my friends back then DOTA 2 was not just a game, it was our passion, it was our dream job. But reality hit us really hard, we realized that not all can make a living out of playing DOTA 2 or any computer games.

2. Have you ever experienced a stressful situation in your past workplace (college if fresh graduate), what was it and how did you overcome it?

Absolutely, there were a lot of stressful situations back then in my workplace. Since I worked as a call center agent before, one of the most stressful situations is to be shifted from one schedule to another. That feeling when your body clock is still adjusting on a night shift and then suddenly your supervisor will tell you that your schedule will be moved to a different time schedule which is a struggle since your body clock is still adjusting on the night shift. However, since I do not have a choice but to accept the new time schedule, what I do is to remind myself why I am working. I make my family an inspiration so that I can still be 100 percent at work even though my body is still in an adjusting period. Reminding yourself why and who you are working for is very helpful in work so that we can overcome any stressful scenarios.

3. In your previous position, what task did you find most challenging and why? What task did you enjoy most and why?

Back then when I was still a call center agent what I found the most challenging task was to wake up at 10:00 PM every day to get ready for work. For me, it is very challenging for the reason that I am not used to waking up at 10:00 PM every day and my body clock is still adjusting to the night shift schedule. Eventually, I got used to it and I overcame my struggle waking up at 10:00 PM. And the task that I enjoyed the most was giving assistance to my customers. Hearing from them that I was a big help with their problems boosts me to be better at what I do. But not all the time it is fun to assist customers since not all of them will be nice dealing with you. There will be always someone to ruin your day but at the end of the day, it is my job to help them.

4. How would your previous managers/coworkers describe you?

I can confidently say that if my previous manager or coworkers were to ask what kind of teammate I am, I think they would say I am a fun, sleepyhead, entertaining kind of teammate. In my previous workplace, I tended to sleep at every opportunity I had since we were on a night shift and my body clock was still not used to it. But I can say that they will find me as a fun teammate since every hangout I tend to join the team so we can have quality time and build a bond just as a team but also personally because I treat my coworkers as a friend not just a teammate. My manager and I used to hang out a lot since we both play basketball so I can say if he is to describe me, he would say I am a fun worker and easy to be with.

5. What personal or professional accomplishments are you most proud of?

The accomplishment that I can say I am most proud of is that I graduated as a Bachelor in Secondary Education majoring in Mathematics. I can say this is the most rewarding accomplishment since before I studied education, I was an Engineering student but due to unfortunate happenings, I failed as an Engineering student. But when I saw my name on the graduating list of BSED majoring in Mathematics back in 2021, I felt very happy that finally I will be graduating with a degree not just any other degree but a Bachelor in Secondary Education majoring in Mathematics degree. The only sad part is that I together with the batch 2021 of Bago City College is that we have not experienced a formal graduation since it was at the peak of the pandemic. We have tried to reach out to the school's management, but they were firm that face-to-face graduation is strictly prohibited. But nonetheless graduating as a Bachelor in Secondary Education majoring in Mathematics is an accomplishment that I am very proud of.
