

1. If anything was possible, what would your dream job be, and why?

If anything was possible, my dream job would be a CPA-Lawyer. This job has been my dream ever since I was a child. I really admired some members of our family who are CPAs. I have seen how they work and how they apply their knowledge to real-life situations. That is why I took up Bachelor of Science in Accountancy during my first year in college at USLS, because BSA was my first choice. Apparently, things did not go as planned. I had good grades during the first and second semester, but I was not able to pass the Qualifying Exam. That is why I transferred to UNO-R, to continue my BSA journey but I also did not make it to our required or cut-off grade. I also wanted to become a lawyer because I enjoyed my law subjects during college, but I think now is not the right time to enroll in law school.

2. Have you ever experienced a stressful situation in your past workplace (college if fresh graduate), what was it and how did you overcome it?

Yes, especially during our thesis and internship. I have experienced a very stressful situation during our thesis, since one of our groupmate was not cooperating and we really had a hard time reaching out to her to follow up the task or assignment that was assigned to her. What we did to overcome the situation was, we asked her to have time for our meeting since it was also suggested by our adviser to talk to her and ask if she still wants to be part of our thesis. During our meeting, we talked about the problem, and we also gave her a chance to make up for the tasks that were assigned to her. I also have a stressful situation during my internship. Since April is tax season, I have experienced how stressful tax seasons are. But I was able to finish my tasks on time by managing my time properly.

3. In your previous position, what task did you find most challenging and why? What task did you enjoy most and why?

During my internship, the task that I found most challenging was the tasks given to me during tax season in which I was assigned to draft and file the specific tax compliance, and I was really pressured that time because of the deadline and I really need to double-check everything before submitting. The task that I enjoyed most during my internship was entering data for financial statements. I enjoyed making financial statements since it tests my knowledge regarding financial transactions.

4. How would your past colleagues or managers describe your work ethic?

During our internship we have an evaluation form given to our supervisors at the end of our internship and based on the evaluation, they see me as a diligent person since I received an award as the most diligent intern. I also got a high score in punctuality and hard-working in our evaluation form. They say that I can always manage to finish my tasks even during stressful situations. I was an all-around intern as well, I have been assigned in the compliance department, but I also work under the auditing department. My colleagues also see me as someone whom they can work comfortably with since we have been also given a chance to describe our colleagues, and most of their description about me is that I am easy and comfortable to work with. During my internship, I really had a good working relationship with my colleagues and supervisors inside and outside the office.

5. What personal or professional accomplishments are you most proud of?

The most personal accomplishment that I was proud of was when I graduated from college. I was proud of myself that I was able to survive and finish my degree on time. I faced a lot of circumstances before I graduated, but I am proud to say that I have overcome those circumstances with the help of my family and friends. I am also proud of myself that I passed the Certified Tax Technician exam last July 4, 2025. I am proud to say that I am already a CTT. It was not easy for me to prepare for the CTT exam. This was my second time taking the exam. I failed the first one because I did not have enough time to review since I also have to prepare my thesis and final defense during that time, but I did not give up and thankfully, I passed during my second take. I really took time studying for the exam for me to pass.
